

## PyCitySchools\_Challenge4 Analysis

This report summarizes both District level – and Individual school level -- information. The output is provided using 2 different data sets:

- 1) Output using complete data from the district
- 2) Output using a subset of data whereby the 9<sup>th</sup> Grade Math and Reading scores for Thomas High School were removed from the data and all output results run again.

By comparing the output from the 2 datasets, specific questions were then answered:

- How is the district summary affected?
- How is the school summary affected?
- How does removing the ninth grader' math and reading scores affect Thomas High School's performance, relative to the other schools?
- How does removing the ninth grade scores affect the following:
  - Math and Reading Scores by Grade
  - Scores by School Per Capita Spending
  - Scores by School Size
  - Scores by School Type

### Output

- District Summary – before and after data removal.
- School Summary – after data removal.
- Top 5 and Bottom 5 Performing Schools – before and after data removal .
- Math and Reading Scores by Grade – before and after data removal.
- Scores by School Per Capita Spending, School Size, and School Type – before and after data removal.
